EDUCATION

Bachelor of Technology in Artificial Intelligence and Data Science
Vidyavardhini's College of Engineering and Technology, Mumbai University

2023 – 2026

CGPA: 9.10 / 10.0

Diploma in Computer Engineering
Theem College of Engineering, MSBTE

2021 – 2023

Percentage: 85.3%

WORK EXPERIENCE

Solo Founder

Dec 2025 – Present

SiteVPN & SkyBoy · Mumbai, India

- SiteVPN, an **open-source privacy solution** offering temporary emails, phone numbers, and VPN routing for secure AI tool usage.
- Building SkyBoy, an **open-source skill infrastructure (SKILL.md)** for AI agents, via web catalog, CLI installer, and MCP server.

AI Research Intern

Jun 2025 – Nov 2025

The SMM Hub · Mumbai, India

- Developed AI Chatbot for lead tracking, achieving **95% accurate user data capture**.
- Implemented fintech authentication backend, achieving **low-latency (150–200 ms) request handling** for 100+ daily users.
- Built a **multi-agent blog generation system using CrewAI** for a client, orchestrating specialized agents (research, drafting, editing, image generation) via OpenRouter LLM APIs.

PROJECTS

Fermes

Live | Code

Node.js · Express · Next.js · Sarvam AI · LiveKit · Google Places API · Supabase (OAuth) · Redis · Docker

- Engineered an AI land-suitability agent, orchestrating Sarvam's LLM with tool-calling over cited geospatial data (elevation, flood zone, soil) and Google Places for nearby suppliers.
- Delivered a derived-verdict site report grounding LLM output in factual sources (USGS, FEMA, USDA) instead of raw model opinion, cutting hallucination risk in high-stakes farming decisions.

Mini-Interfaze: Receipt Field Extractor

Live | Code

PyTorch · CUDA · CRNN · Transformers · EasyOCR · Safetensors · Hugging Face Hub · Gradio

- Designed a native-fusion architecture from scratch: CRNN (CNN + BiLSTM + CTC) encoder → transformer decoder embedding space → fixed-schema JSON (company, date, address, total) with bounding-box + confidence metadata.
- Wrote a custom fused CUDA kernel (RMSNorm + residual) to speed up training.

Wispr Flow Clone

Live | Code

PyTorch · CUDA · Transformers · Whisper · Hugging Face Hub · Gradio

- Fine-tuned a two-stage pipeline from scratch: Whisper ASR (verbatim, disfluency-preserving) → fine-tuned LLM for filler removal, grammar fixes, and tone adaptation across email/chat/notes modes, keeping all rewriting confined to an auditable system prompt.
- Wrote a custom fused CUDA kernel (bias-add + GELU) that reduces GPU memory traffic.

Message Notification Router

Code

Python · Sarvam AI (LLM/STT/Vision) · Pandas · Tenacity

- Built a multimodal WhatsApp router: text + transcribed voice (Saaras v3 STT) + OCR'd images (Sarvam Vision) → fused reasoning context → Sarvam-105B classifies notify/digest/mute.
- Designed a context-assembly layer fusing engagement, group roles, business history, and repetition signals into one JSON payload, feeding risk/scam signals as observations.

TECHNICAL SKILLS

Languages: Python, C++, CUDA, Bash, SQL

AI/ML: Machine Learning, Deep Learning, PyTorch , Hugging Face, Multimodal and Multilingual AI, Retrieval-Augmented Generation (RAG), Model Context Protocol (MCP), GPU Optimization, Fine-tuning (PEFT), Agentic AI, Prompt Engineering, Context Engineering

Frameworks: React, Flask, FastAPI, Express.js, REST APIs

Databases: MongoDB, Redis, Chroma DB

Tools: Git, GitHub, Docker, CI/CD, Jupyter Notebook

ACHIEVEMENTS

- Ranked 1st in the Department of Artificial Intelligence & Data Science
- 2nd Place at VNPS'25 – National-Level Project Showcase, VCET Mumbai
- Open-sourced models on Hugging Face Hub, collectively surpassing 100k+ downloads across Neural Networks, LLM's, ASR, translation, and vision architectures
- Launched aynlp, an open-source NLP utility library with 7k+ downloads, enabling developers to solve common NLP tasks efficiently
- Authored 3+ technical articles on AI Agents and Reinforcement Learning in VCET Techzette
- Kaggle competitor with 15+ badges across Notebooks and Competitions, applying data science and ML techniques to real-world problems
- Solved 350+ DSA problems across competitive coding platforms
- OSS Contribution basedosdados/sdk (feat(infra): (#1372) add GCP Console link), PR reviewed and merged by maintainers
